—To Close the Gap of Understanding about Atomic Weapons—

Abstract

The interest about nuclear weapons seems to be increasing around the world. Various positive actions for denuclearization has been taken. One of the action is an original supplementary material which our senior school students made in the past. We made a guide book for teachers because we would like more students to use this material.

Problem

There are two materials that our senior class students made. They donated these to U.N. But few people use these materials.

Most people don't know

How to use!!!
