

Vietnam's Development

Their serious garbage problem and the Japanese System

1. Why Choose Vietnam?

Recently Vietnam has made remarkable advances in economic development. However, along with economic development, they have exhausted garbage in large quantities and this has become a problem.

In Vietnam, the rules for disposing garbage have not been decided yet.

2. The Actions of Japanese Companies

(1) AEON and Ichikawa Kankyo Engineering

(2) Hitachi Zosen

3. Conclusion

- Vietnam's garbage problem proved to be serious.
- We have found out how Japanese companies are working to solve Vietnam's garbage problem.
- Let's think about social problems as something familiar and not something that is unrelated to us.
